### SECTION 11 SPILL AND DISPOSAL INFORMATION

IN CASE OF TRANSPORTATION ACCIDENTS, CALL THE FOLLOWING 24-HOUR TELEPHONE NUMBER (800) I-M-ALERT or (800) 462-5378.

#### SPILL CONTROL AND RECOVERY:

**Small liquid spills:** Contain with absorbent material, such as clay, soil or any commercially available absorbent. Shovel reclaimed liquid and absorbent into recovery or salvage drums for disposal. Refer to CERCLA in Section 14.

**Large liquid spills:** Dike to prevent further movement and reclaim into recovery or salvage drums or tank truck for disposal. Refer to CERCLA in Section 14.

For large indoor spills, evacuate employees and ventilate area. Those responsible for control and recovery should wear the protective equipment specified in Section 10.

**DISPOSAL:** If this product becomes a waste, it does not meet the criteria of a hazardous waste as defined under the Resource Conservation and Recovery Act (RCRA) 40 CFR 261, since it does not have the characteristics of Subpart C, nor is it listed under Subpart D.

As a non-hazardous liquid waste, it should be solidified with stabilizing agents (such as sand, fly ash, or cement) so that no free liquid remains before disposal to an industrial waste landfill. A non-hazardous liquid waste can also be deep-well injected in accordance with local, state and federal regulations.

Cobalt compounds - Section 112

In October 1990, Congress passed the Clean Air Act Amendments of 1990. This amendment added 189 compounds and classes of substances to Section 112 of the Clean Air Act. The Comprehensive Environmental Remediation, Cleanup, and Liability Act (CERCLA) in turn requires spill reporting of materials listed under Section 112. For new substances to the CERCLA list, a reportable quantity (RQ) of one pound is automatically assigned until the Environmental Protection Agency (EPA) establishes a scientifically valid value.

Cobalt sulfate is one of the compounds that falls into this situation. Nalco Chemical Company will base our product RQ on the one pound cobalt sulfate RQ until the EPA modifies the value.

irritation (with bleeding). Necropsy of decedents confirmed the severe gastrointestinal irritation.

Rating = Toxic by Ingestion

ACUTE DERMAL TOXICITY (ALBINO RABBITS) of a similar product:  
LD50 = Less than 2,000 mg/kg

COMMENTS: All ten rabbits (5 male and 5 female) receiving a single dermal dose of 2,000 mg/kg of a similar product died with 48-hours after application of the dose. Signs of intoxication included vocalization, salivation, ataxia, tremors and severe local skin reactions including corrosive action.

Rating = Slightly toxic by dermal absorption

PRIMARY SKIN IRRITATION TEST (ALBINO RABBITS):  
SKIN IRRITATION INDEX DRAIZE RATING: 8.0/8.0 Corrosive

COMMENTS: Application of 0.5 ml of a similar product to a 6cm<sup>2</sup> site on the shaven back of each of a group of six albino rabbits (4-hour occluded contact) produced severe redness and swelling including corrosive action. These findings were still present after 72-hours at which time the animals were euthanized.

PRIMARY EYE IRRITATION TEST (ALBINO RABBITS):  
EYE IRRITATION INDEX DRAIZE RATING: Corrosive

COMMENTS: Instillation of 0.1 ml of a similar product into the conjunctival sac of one eye of each of a group of six albino rabbits produced severe ocular injury characterized by severe redness, swelling and discharge, and corneal opacity including corrosive action. No irritation rating could be calculated. All animals were euthanized after 72-hours. No eye irritation index could be calculated.

SKIN SENSITIZATION: Cyclohexylamine can cause sensitization in susceptible individuals.

OTHER TOXICITY RESULTS: Mutagenicity tests on morpholine provided the following results: Ames was negative; sister chromatid exchange was equivocal; cell transformation was positive; mouse lymphoma was weakly positive and rat hepatocyte/DNA repair was negative. A similar battery was run on cyclohexylamine with inconclusive results. Diethylaminoethanol is nonmutagenic in the Ames test using Salmonella strains TA98, 100, 1535 and 1537 with an

without metabolic activation.

CHRONIC TOXICITY RESULTS: A two year rat inhalation study with morpholine was negative for cancer. A one year feeding study in Beagle dogs at dose levels of 500 and 1,000 ppm of diethylaminoethanol showed no significant effects.

FLASH POINT: 117 Degrees F (PMCC) ASTM D-93

EXTINGUISHING MEDIA: Based on the NFPA guide, use dry chemical, foam, carbon dioxide or other extinguishing agent suitable for Class B fires. Use water to cool containers exposed to fire. For large fires, use water spray or fog, thoroughly drenching the burning material.

UNUSUAL FIRE AND EXPLOSION HAZARD: May evolve NOx under fire conditions.

**SECTION 9 REACTIVITY INFORMATION**

INCOMPATIBILITY: N-nitrosamines, many are cancer causing agents to laboratory animals, may be formed when certain amines are mixed with nitrous acid, organic or inorganic nitrites or atmospheres with high nitrous oxide concentrations.

Avoid contact with strong oxidizers (eg. chlorine, peroxides, chromates, nitric acid, perchlorates, concentrated oxygen, permanganates) which can generate heat, fires, explosions and the release of toxic fumes.

THERMAL DECOMPOSITION PRODUCTS: In the event of combustion CO, CO2, NOx may be formed. Do not breathe smoke or fumes. Wear suitable protective equipment.

## SECTION 10 PERSONAL PROTECTION EQUIPMENT

**RESPIRATORY PROTECTION:** If it is possible to generate significant levels of vapors or mists, a NIOSH approved or equivalent respirator is recommended.

For large spills, entry into large tanks, vessels or enclosed small spaces with inadequate ventilation, a pressure-demand, self-contained breathing apparatus is recommended.

**VENTILATION:** General ventilation is recommended. Additionally, local exhaust ventilation is recommended where vapors, mists or aerosols may be released.

**PROTECTIVE EQUIPMENT:** Wear impermeable gloves, boots, apron and a face shield with chemical splash goggles. Examples of impermeable gloves available on the market are neoprene, nitrile, PVC, natural rubber, viton and butyl (compatibility studies have not been performed). A full slicker suit is recommended if gross exposure is possible.

The availability of an eye wash fountain and safety shower is recommended.

If clothing is contaminated, remove clothing and thoroughly wash the affected area. Launder contaminated clothing before reuse.
